

148/149 - Customizing Auth Pages

- open up client/styles_base.scss
- change the body background color

```
*{  
  
  padding: 0;  
  
  margin: 0;  
  
}  
  
html {  
  
  font-size: 62.5%;  
  
}  
  
body {  
  
  background-color: $body-background-color;  
  
  font-family: Helvetica, Arial, sans-serif;  
  
  font-size: $base-font-size;  
  
}
```

- now go to define that variable in _variables.scss

```
//color  
  
$brand-primary: #5b4681;  
  
$grey: #dddddd;  
  
$light-grey: #f9f9f9;  
  
$dark-grey: #777777;  
  
  
//Body  
  
$body-background-color: #fafafa;  
  
  
  
//spacing  
  
$space: 1.4rem;  
  
$site-max-width: 50rem;
```

- in `_boxed-view.scss` remove the following line

```
.boxed-view {  
    align-items: center;  
    background: $boxed-view-overlay-bg;  
    display: flex;  
    justify-content: center;  
    height: 100vh;  
    width: 100vw;  
  
}
```

- go back to `_variables.scss` and add the following color

```
//color  
  
$brand-primary: #397ab1;  
  
$grey: #dddddd;  
  
$light-grey: #f9f9f9;  
  
$dark-grey: #777777;  
  
  
//Body  
  
$body-background-color: #fafafa;  
  
  
//spacing  
  
$space: 1.4rem;  
  
$site-max-width: 50rem;
```

- create a new variable

```
//form inputs  
  
$input-border: $grey;  
  
$input-spacing: 1rem;  
  
  
// Boxed view
```

```
$boxed-view-overlay-bg: $grey;

$boxed-view-bg: white;

$boxed-view-border-color: grey;
```

- **now lets use** \$boxed-view-border-color in the _boxed-view.scss

```
.boxed-view {
  align-items: center;
  display: flex;
  justify-content: center;
  height: 100vh;
  width: 100vw;
}

.boxed-view__modal {
  background: fade-out($boxed-view-overlay-bg, .3);
  position: fixed;
  top: 0;
  right: 0;
  bottom: 0;
  left: 0;
}

.boxed-view__box {
  background-color: $boxed-view-bg;
  border: 1px solid $boxed-view-border-color;
  padding: 2.4rem;
  text-align: center;
  width: 24rem;
```

- create a new variable in _variables.scss

```
//color
```

```
$brand-primary: #397ab1;

$grey: #dddddd;

$light-grey: #f9f9f9;

$dark-grey: #777777;

//Body

$body-background-color: #fafafa;

$body-default-color: #333333;

//spacing

$space: 1.4rem;

$site-max-width: 50rem;
```

- now go to `_base.scss` to use this new variable

```
*{

    padding: 0;

    margin: 0;

}

html {

    font-size: 62.5%;

}

body {

    background-color: $body-background-color;

    color: $body-default-color;

    font-family: Helvetica, Arial, sans-serif;

    font-size: $base-font-size;

}

p{
```

```
    margin-bottom: $space;
}

h1 {
    font-weight: 300;
    margin-bottom: $space;
}

h2 {
    font-size: $large-font-size;
    margin-bottom: $space;
}

a {
    color: $body-default-color;
```

-
